SUMMARY

I'm a Computer Science graduate student with a passion for computing, problem solving and engineering. I pride myself in trying to achieve the most efficient solution and like the thrill of solving problems and building a solution that could have a impact on the real world. Since I was a child, I've had an interest in STEM and have undertaken hobbies to expand my analytical and problem solving skills. I am an extremely hard worker, and often finishes my projects multiple weeks before their deadlines. I was raised to respect the time of others and to respect my own work and, therefore, I always do more than what is expected from me. I am excited and eager to start building my life long career and expand my knowledge by learning from mentors and industry experts. After I listened to Gendac's speech at Stellenbosch University and the quiz night, the next evening; I got convinced that Gendac is the company I would want to work for, not only to receive a salary and build basic job experience, but to grow my career and knowledge in engineering and Computer Science, as well as to be part of a family that care about the end project and it's fellow employees.

EDUCATION

Stellenbosch University
BSc in Computer Science

Stellenbosch, SA
Expected Dec 2026

- **Mark to date:** 75.357 % as of this month*
- **Specialisation:** While I am currently studying general Computer Science, I spent two of the three years studying towards a focus of Data Science and thus have a strong background in Data Science and Statistics.
- **Awards:** I was honoured with the Excel Award, which is allocated to the top 1 to 5% of first-time entry, first-year registered students per faculty.

Durbanville Hoërskool
National Senior Certificate

Durbanville, SA
2023

Subjects: 89.857% average

Afrikaans Home Language	84%
English Home Language	86%
Mathematics	88%
Life Orientation	91%
Engineering Graphics and Design	98%
Information Technology	97%
Physical Sciences	85%

Notable Achievements:

- Subject and Academic Prizes:
 - Engineering Graphics and Design - best in year 2021 - 2023
 - Top 15 Academically - per year 2021 - 2023
- Leadership: Captain for my grade 12 rugby team

*This refers to the average of the recognized modules as outlined by the Faculty of Science Yearbook and the concessions that were granted for BSc Computer Science (General Focus). It excludes modules completed under the Data Science focus.

TECHNICAL SKILLS

- **Languages:** Java, Python, C, SQL.
- **Tools & Frameworks:** JavaFX, Pandas, NumPy, Scipy, Simpy, Matplotlib, Seaborn, Git, Tailscale, Blender, NeoVim, VS Code, Flutter, Dart, $\text{\LaTeX}$.
- **Environments:** Ubuntu Linux, Windows.
- **Core skills:** Prescribed Stellenbosch University BSc Computer Science curriculum, Data analysis, interpretation and visualisation, exposure and basic knowledge of dart, firebase and google cloud. Basic modeling and rendering knowledge (hobby)

TECHNICAL PROJECTS

StelliesLive *Dart, Flutter, Firebase*

- **Description:** During my free time I played around with and investigated the workflow and ability of LLM chat agents and their ability to code and a coherent app capable and worthy of releasing it to the public. My full conclusions can be found in the README on my GitHub profile. [stelliesLive](#)
- **Tech Stack:** The app was coded in dart on the flutter framework in order to build to multiple platforms without having to recode sections. Google's firebase features was used throughout the app, including but not limited to authentication, Firestore and cloud functions.

EXPERIENCE

Manual Labour | *Rhodes Food Group - Juice Plant factory shop* Nov 2024 – Dec 2024

- **Description:** Worked as a general labourer in the factory shop and warehouse, packing shelves and orders, as well as helping customers.
- **Skills learned:** Directly working with customers, in a team, as well as endurance and grit to endure long tiring days.

SOFT SKILLS

Critical/Logical Mind	Innovative, Fully computer literate, Complex problem-solving skills.
Predictable	Fast worker, especially under pressure. Strong decision maker. Honest and Loyal.
Life Long Learner	Large and wide interest span and general knowledge, as well as a fast learner with great long term memory
Problem Solving	Ability to analyze complex systems and implement efficient solutions.
Reliability	Consistent history of meeting deadlines and exceeding project requirements.
Adaptability	Fast learner capable of pivoting between different programming paradigms and environments.
Collaboration	Experienced in team work and collaborative development (Stellenbosch University Group Projects).

INTERESTS

- **Simulations:** Reading up on high performance simulations and how they are accomplished as well as playing them. Some of these include: Sim racing, flight simulators, DCS ect.
- **Visual FX:** The visual effects industry in general. This ties in with my interest in simulations as much of vfx is simulations.

- **STEM entertainment:** I spend my free time watching STEM content on platforms like YouTube and Nebula.
- **Aviation and Motor Racing:** This again links to my interest in simulations, as I find airplanes, cars, and how they are represented in software and games fascinating.
- **Engineering:** I like to play around in the garage with basic electronics, welding and wood working and have built my fair share of mini projects with my father at home.
